

This instruction is for student and guests with a Mac.

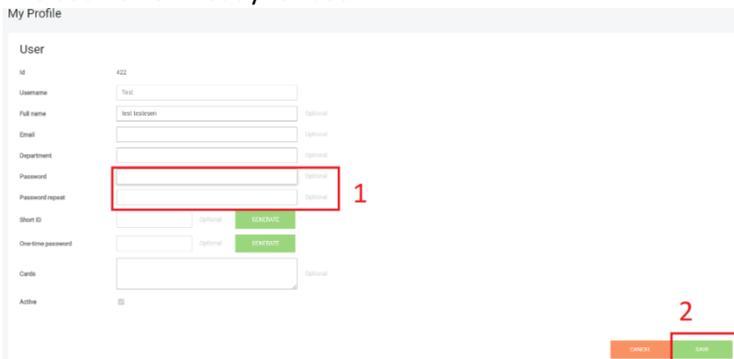

1. Before you start you will have to get a user from IT. To get it, send a mail to ikt@fjellhaug.no. If you are a student, the username will be equal to your student number and your password will be equal to your four-digit pin. If you are a guest, the username and password will be given by IT.
2. First thing after getting the username and password is going to <https://fjellhaug.eop.kmsky.no:8443/> and log in with your username and password.

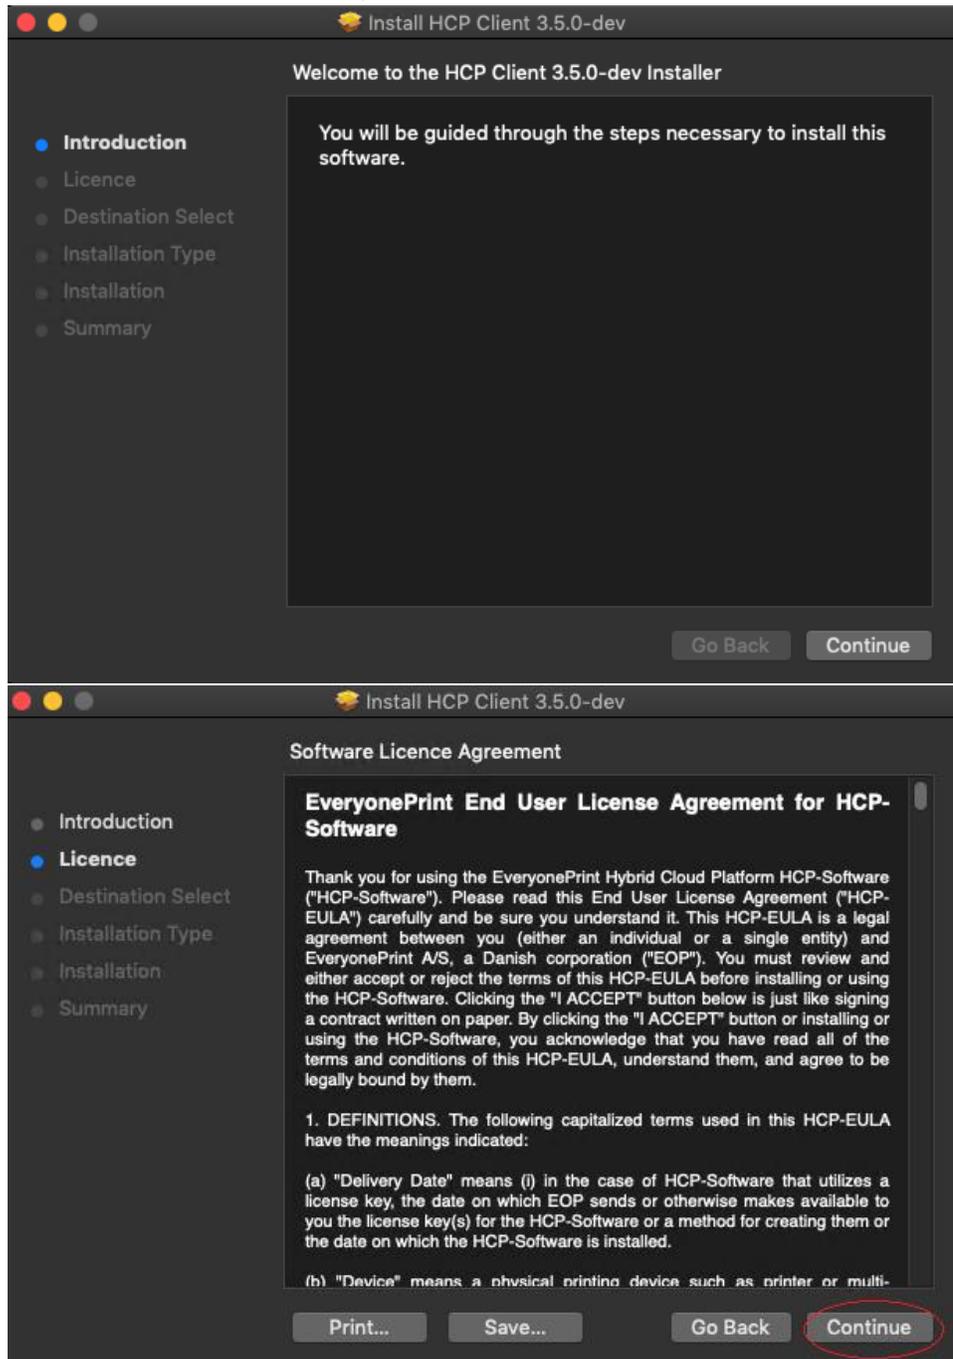

3. When logged in, go to «My profile» and then «Edit».

4. When editing «Edit», give preferred password in password and password repeat and press save. The user is now ready for use.

5. Go to <https://fih.fjellhaug.no/ikt-verkt%C3%B8y/skrivere> and choose the client file that fits your operation system. Download and open this file.
6. Follow the instructions in the pictures below.

Install HCP Client 3.5.0-dev

To continue installing the software you must agree to the terms of the software licence agreement.

Click Agree to continue or click Disagree to cancel the installation and quit the Installer.

Read Licence Disagree **Agree**

the HCP-Software. Clicking the "I ACCEPT" button below is just like signing a contract written on paper. By clicking the "I ACCEPT" button or installing or using the HCP-Software, you acknowledge that you have read all of the terms and conditions of this HCP-EULA, understand them, and agree to be legally bound by them.

1. DEFINITIONS. The following capitalized terms used in this HCP-EULA have the meanings indicated:

(a) "Delivery Date" means (i) in the case of HCP-Software that utilizes a license key, the date on which EOP sends or otherwise makes available to you the license key(s) for the HCP-Software or a method for creating them or the date on which the HCP-Software is installed.

(b) "Device" means a physical printing device such as printer or multi-

Install HCP Client 3.5.0-dev

Select a Destination

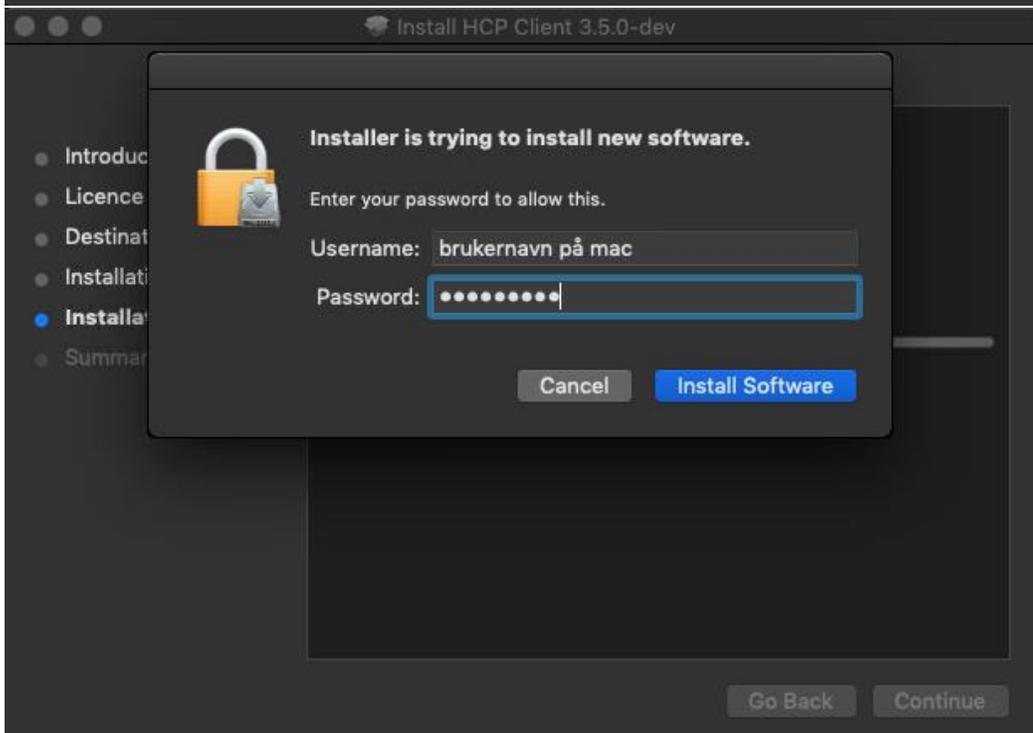

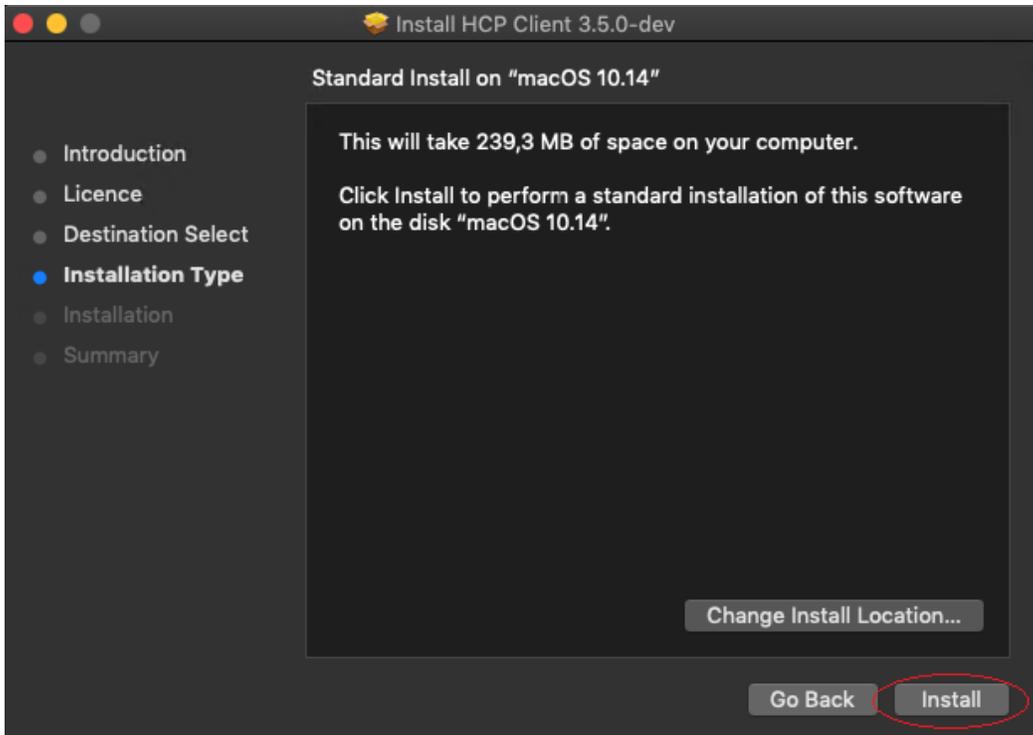

Select the disk where you want to install the HCP Client 3.5.0-dev software.

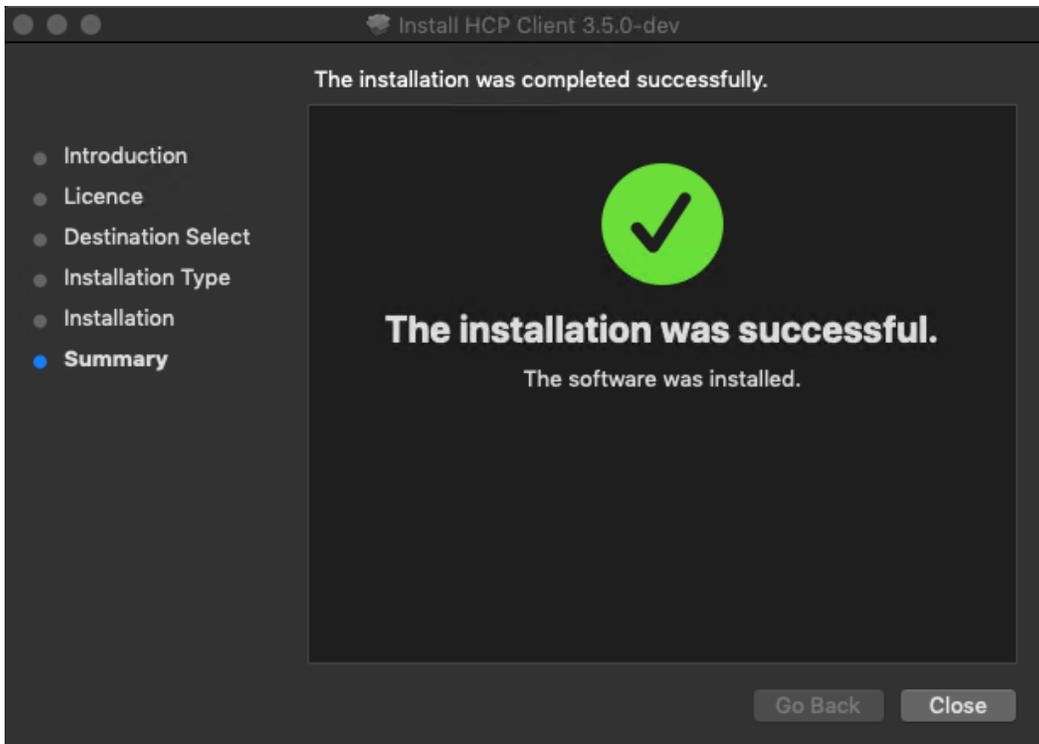

macOS 10.14
15,48 GB available
42,74 GB total

Installing this software requires 239,3 MB of space.
You have chosen to install this software on the disk "macOS 10.14".

Go Back Continue

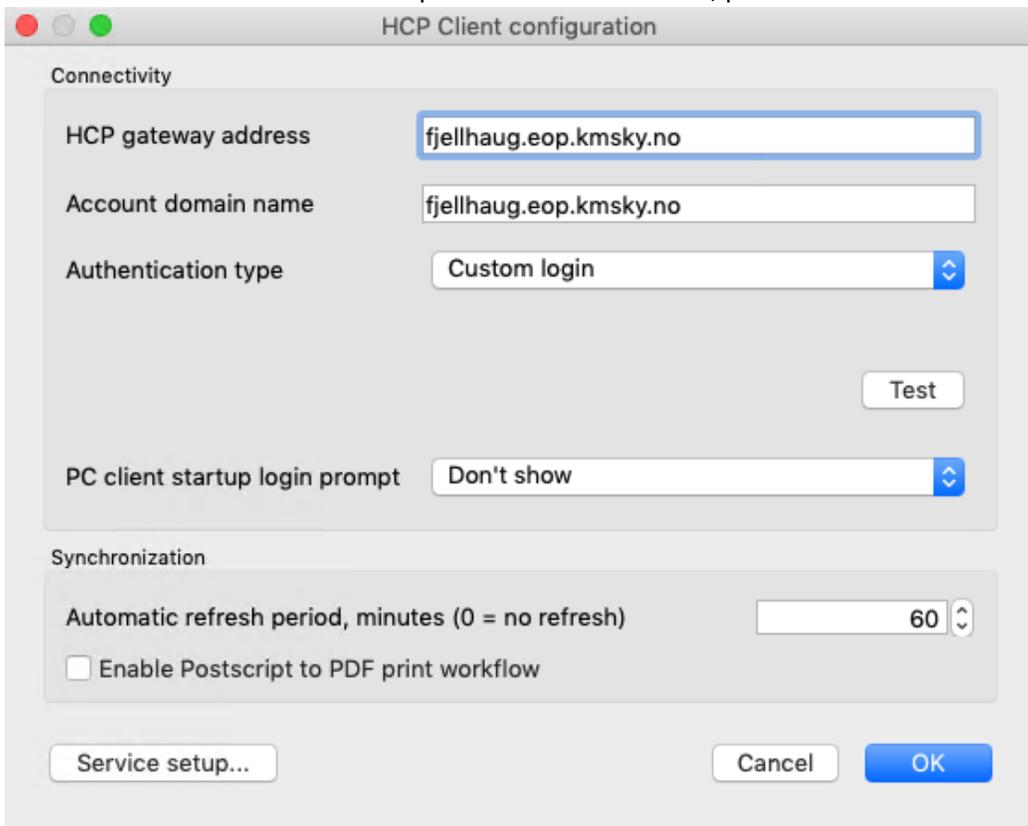

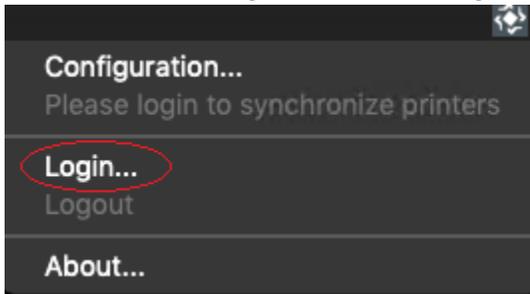

7. Start clientconfiguration by clicking the EOP icon shown below.

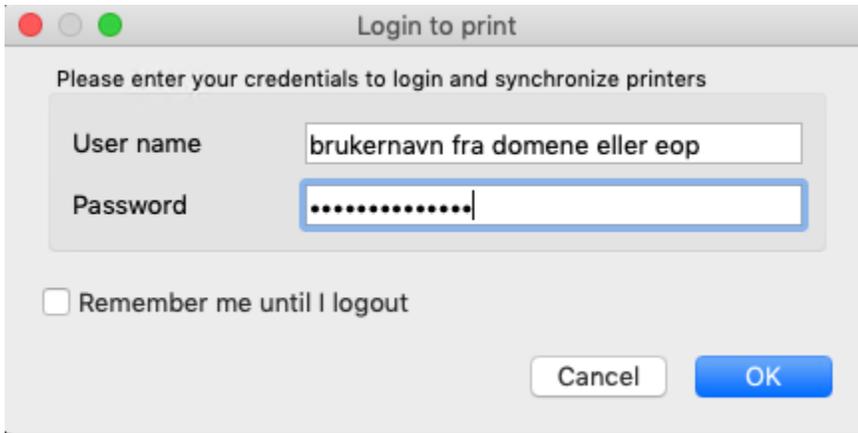

8. Enter the values shown below and press "Test". If succeeded, press ok.

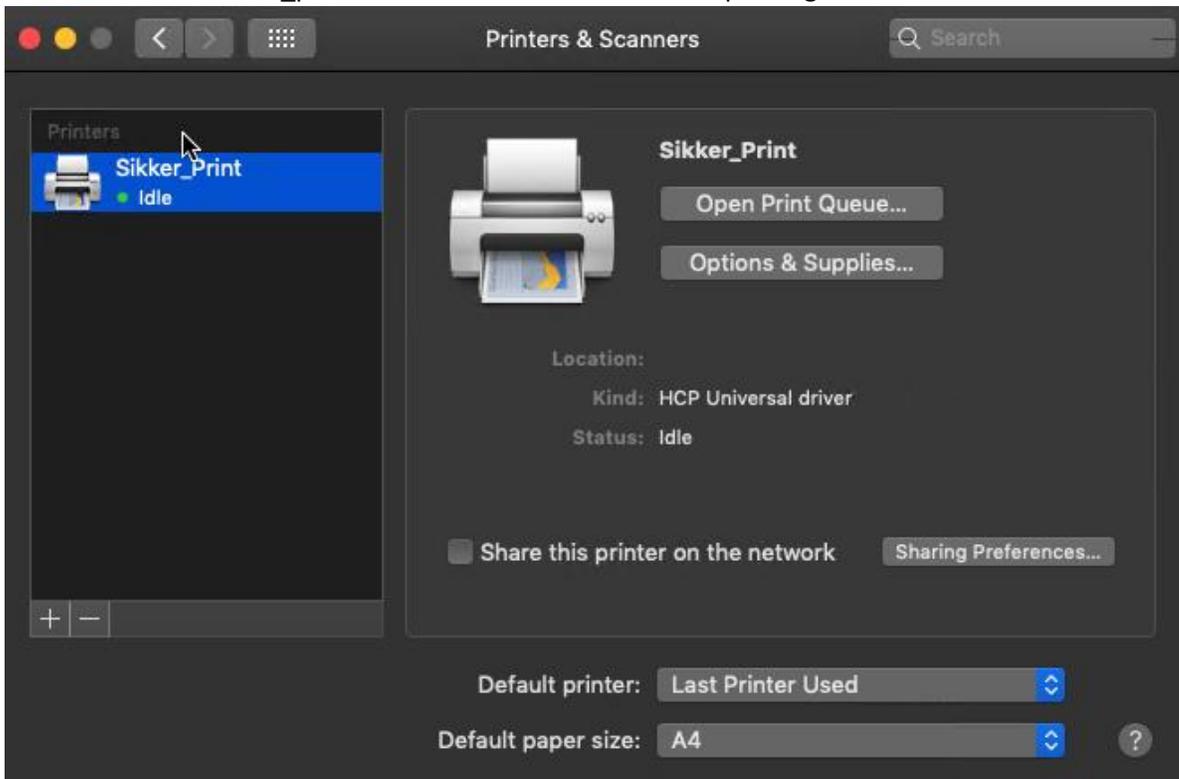

9. Press the EOP icon again and choose Login...

10. Write your username and password and press ok.

11. When this is don Sikker_print will be an available unit when printing. Choose this one.

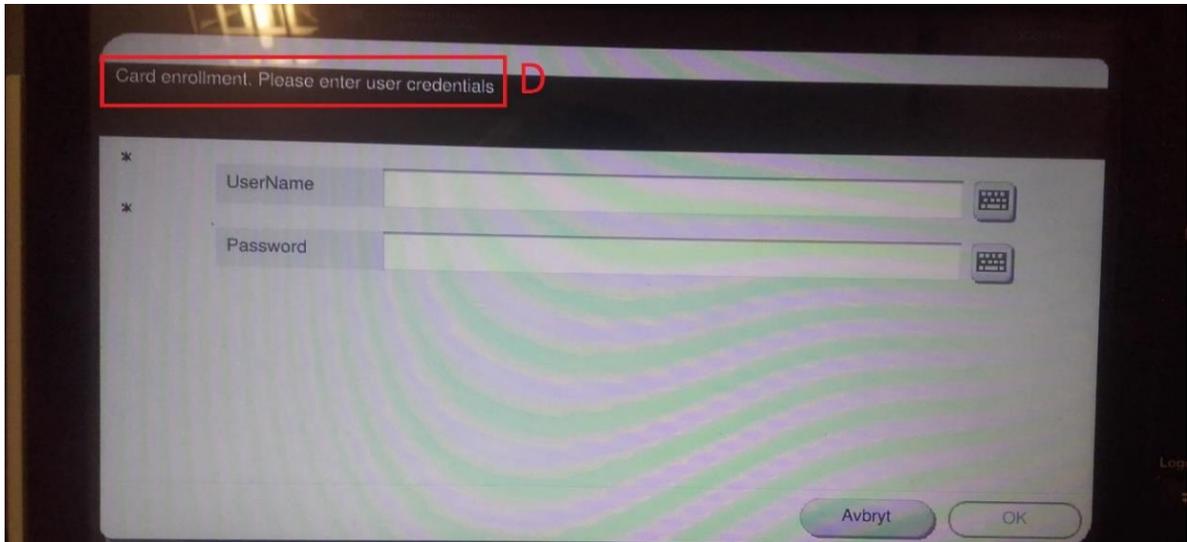

12. Go to the printer in the library.

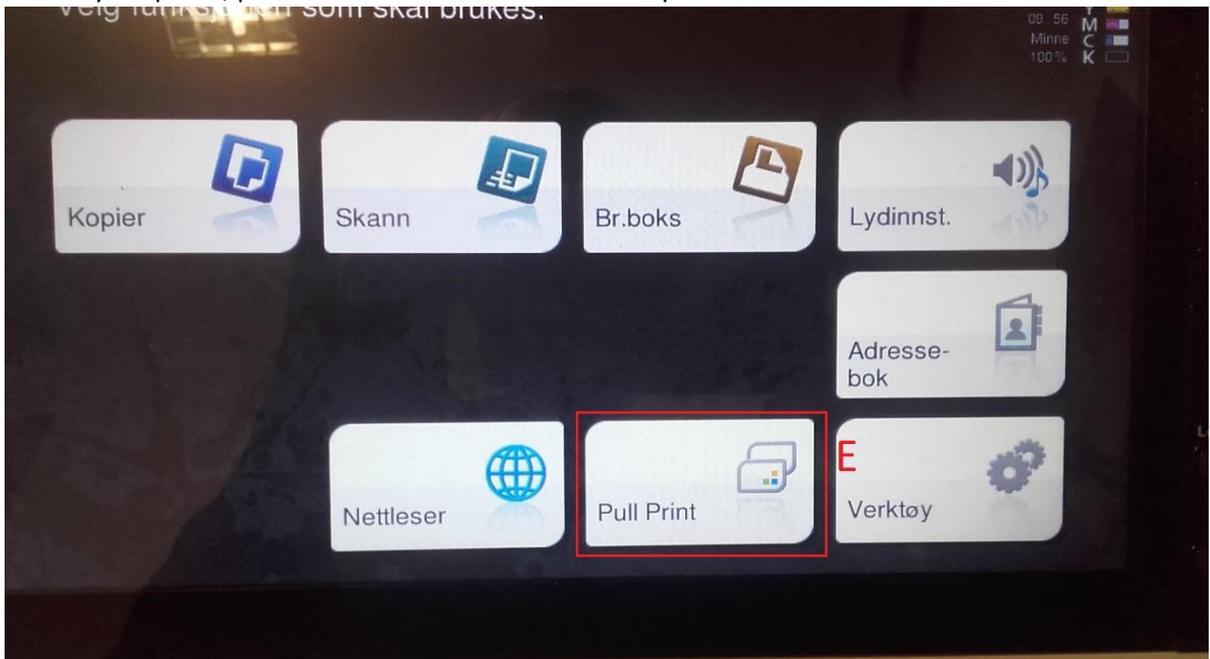

13. If you cannot see the screen in canvas A, press the button in canvas B to get the screen. If you lack a key chip, write your username and password and jump to point 14. If the screen equals A and you got a key chip, hold the key chip in front the mark in canvas C.

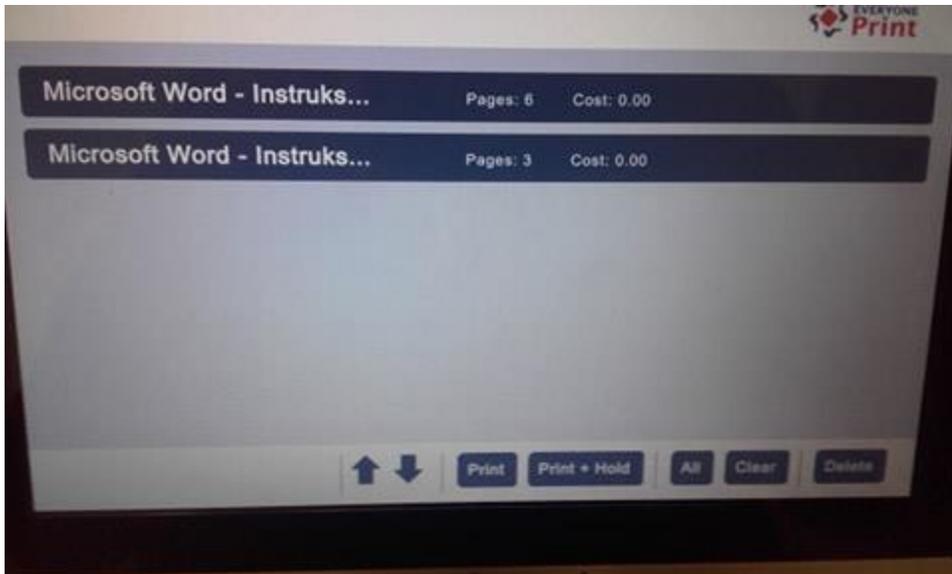

14. When the key chip has been held in front of C described above you will get a screen like the one below. Easiest way to see if you have come to the right screen is by looking for the text inside canvas D in the screen below. Write your username and password and press ok. Your key chip will now be tied to your user.

15. To find your prints, press «Pull Print» in canvas E in the picture below.

16. When you have pressed «Pull Print» you get an overview of your active print jobs and features tied to those. «Print» prints marked jobs, «Print + Hold» do the same, but keep the jobs in the list, «All» marks all jobs in the list, «Clear» remove all markings from the list and «Delete» deletes all marked jobs.

This is an instruction for first time use of Secure Print. From now on, only point 11, 13, 15 and 16 are required when printing.
